

Lacking of copyright in Thailand

Nowaday people in Thailand still have a little knowledge about there is a law about copyright.They use someone's work to publish on their works in a commercial way. Which is illegal.

When people create an artwork whether it is a drawing, music, logo, etc. Everything have a copyright law protected since the creator finish the work.The problem is that there are many people steal the work to publish on their work in a commercial way. When the creator realize that the work which they have work for many hours got steal by someone else is not as hurt as when the creator tell the thief that you should not steal someone work and the thief said that you publish your work everyone can take the work and do what you want to do. This is the huge misunderstand to most people who think you can take the work from someone else. People in Thailand should strat realize to understand about copyright more clearly. For someone to create an artwork it is not easy and it take a lot of time to create it. A lot of creator stop showing his work on social media from this reason.

Copyright have protect the artwork's creator since the artwork finish the work for someone to steal it and think it is legal should understand that there it is not. If people respect by not stealing others work. The world of creation would has more fantastic artwork to show.
